Claim Rejections - 35 USC § 102

4. Claims 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Frank et al.

Frank et al. show a fuel injector comprising a housing 1 having a first bore with a first diameter and a second bore with a second bore having a diameter larger than the first diameter, and a step between the first and second bores, the step having a width; a first component 6 and a second component 2 as recited; and a coining ring having an annular width and a height as recited.

Claim Rejections - 35 USC § 103

5. Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank et al.

Frank et al. disclose all of the structural limitations of the instant invention. Therefore, whether a product is patentable depends on whether it is known in the art or it is obvious and is not governed by whether the process by which it is made is patentable.
